Try the AI Policy Course

Four short sessions. Each presents the essence of every course module. Join one or all four. No prior knowledge of AI or policy needed.

01 MODULE 1

What is policy?

Policy, regulation and governance are not the same. Learn the policy cycle, and why technical choices are already policy choices.

60 min (45 min - presentation + 15min – Q&A)

02 MODULE 2

What is AI?

How AI systems work. What machine learning can and cannot do. What large language models mean for governance.

60 min (45 min - presentation + 15min – Q&A)

03 MODULE 3

The global AI governance

A map of who governs AI. The OECD Principles, UNESCO, the EU AI Act, the G7 Hiroshima Process, the African Union, ASEAN and other regional frameworks.

60 min (45 min - presentation + 15min – Q&A)

04 MODULE 4

From knowledge to influence

Write a policy brief policy makers read. Respond to a consultation. See how sandboxes, audits, standards and procurement put policy to work.

60 min (45 min - presentation + 15min – Q&A)

WHO SHOULD COME

Students, faculty, researchers, civil servants, advocates, engineers. Anyone who works where AI meets public life.

WHAT MAKES IT DIFFERENT

Not how to build AI. How AI is governed, by whom, through what tools and with what effect.
